Analysis of the causes and impacts of the most recent meteorological climatic and tectonic hazards including:	Issues associated with Globalisation, including:
<ul style="list-style-type: none">• Australian Bush Fires• U.K. and Europe Winter Storms• Recent Earthquakes• Drought and its Impact in South Africa	<ul style="list-style-type: none">• Cuba and Globalisation• Are we in an era of deglobalisation?
Other titles include:	
<ul style="list-style-type: none">• Global governance and an assessment of its success in handling the climate emergency• A continuing series on sustainable cities, including greening the city and healthy cities• Latest research on water and carbon cycles: The importance of peatlands and the impact of climate warming on Antarctica• A range of Factsheets to support students doing the NEAs, including analysing climate change, hazard impacts, soil infiltration rates and air, water, and land pollution surveys to help give students more confidence and a greater range of ideas	

Geo Factsheets are of high relevance to A-Level students working on the current specifications. They include up-to-the-minute case studies and provide students with the latest in-depth analysis of key physical, human and economic topics. Our Geography authors are experts in their fields and many of them are senior examiners.

Your subscription also includes access to the archive of 412 Geography Factsheets plus PowerPoints, Questions and Answers, Singapore Articles, E-Books and Interactives. These products have now been combined into one yearly membership offering quick and easy access, all in one place.

All of our resources are site-licensed, meaning that every student and member of staff in your institution will have access to this growing resource.
